## Movement

Type	Description
<b>Mechanical</b>	Power is generated through a winding function, by hand.
<b>Automatic</b>	Power is generated by the natural movement of one's wrist.
<b>Kinetic</b>	The movement of one's wrist energises and stores power in a battery.
<b>Digital</b>	Time display is given in figures by electronically operated short lines (digits) within a translucent dial of crystal liquids.
<b>Quartz</b>	A miniature electric motor is powered by a small replaceable battery cell.
<b>Ana-Digital</b>	Quartz time and digital time appear as separate readings on the face of the dial.
<b>Eco-Drive</b>	A permanent battery is constantly re-energised by the power of natural and electrical light.

## Water resistance

Indications on watch	Face washing, wet in rain, splashing, no water pressure	Swimming, washing, bath or shower	Water sports, skin diving	Scuba-diving	Saturated diving
